

Versatile and easy-to-install

ZigZag Roll is available in various widths from 26" (600mm) to a maximum of 6' (1800mm). Supplied in rolls up to 490' (150m) in length, it can be cut to the required length making it an extremely versatile lower-cost solution that can be used throughout milking sheds and internal, or external, walkways.

'Lower-cost and long-lasting rubber flooring solution for improved cow-comfort.'

"Since installing our DairyGrip rubber flooring we have never lost a cow, couldn't do without it."

Ontario Dairy Farmer

"We scrape two times a day with a skid loader, ZigZag Roll is the only product out there that holds up."

ZigZag Roll

**Used by the Dairy Industry
for over 16 years**

DairyGrip – Durable Rubber Flooring for the Dairy Industry

DairyGrip's durable rubber flooring products have been providing the ultimate under-hoof cow comfort and improved traction in milking sheds and walkways for over 16 years throughout North America, Europe and Japan.

Many studies have shown that cow comfort has a direct effect on improved milk yields, milk quality and fertility rates of dairy cows. Made from 100% recycled rubber DairyGrip is an obvious choice for a versatile and highly-durable rubber flooring that offers excellent cow comfort.

ZigZag Roll - The Ultimate in Durable Flooring

ZigZag Roll is DairyGrip's premier product that is made from recycled quality rubber with an integral steel cable system to ensure it does not stretch or warp over time. It offers maximum durability, noise reduction, improved traction and is backed up by a 10-year warranty (conditions apply).

As it is supplied in rolls, where lengths can be cut to exact size, ZigZag Roll experiences far less lifting and damage than traditional interlocking mats. This, together with the integral steel cable system, ensures that ZigZag Roll will not stretch and can easily withstand tractor weight and high impacts. This tough and highly-durable material is left unaffected by automatic scrapers or skid steers making cleaning easy and efficient.

'Integral steel cable system'

- Excellent Cow Comfort
- Unique integral steel cable system
- Dunlop, Bridgestone, Goodyear recycled rubber
- 3/4" to 1" profile
- 10-year warranty
- Excellent traction
- Various widths
- Lengths up to 490 feet
- Noise reduction

Excellent Cow Comfort

DairyGrip's ZigZag Roll provides cows with improved cushioning under-hoof and its unique grooving ensures good traction that minimises leg injuries to dairy cows, whilst protecting their hooves.

ZigZag Roll is an affordable and versatile option for dairy farmers to improve the wellbeing and overall comfort of their herd as well as increasing herd yields. At significantly less capital outlay than installing traditional matting, ZigZag Roll will last up to four times longer than other products.

100% recycled quality rubber for minimal environmental impact

ZigZag Roll is manufactured from 100% recycled rubber conveyor belts used in the mining industries. Using only the belts with the minimum amount of wear, these highly-durable belts are re-conditioned and the unique ZigZag Roll traction grooves applied.

Recycling the belts into durable rubber flooring ensures the belts don't end up in land fill and negatively impacting our environment.

Only premium rubber brands are used in the DairyGrip durable rubber flooring.
