

SEGREGATION FLOOR MATTRESS

The Segregation flooring is a mattress system using the same rubber crumb filled under mattress as the Pasture Mat mattress system has used for 20 years. These under mattresses are 60kg each and cover 1.84square metres each. A thick black cover is then fitted wall to wall over the top creating an incredibly durable and easy to clean, comfortable floor. The complete system has 60mm of comfort, and has been proven to last many years. Ideally it is installed in pens up to 3.65m (12ft) in order to avoid joins. These can be as long as necessary.

Also suitable for:

- Maternity pens
- Bull pens
- Horse stables (www.stablecomfort.co.uk)

Optional Premium Pad foam layers of 20mm or 30mm can be added for additional surface comfort.
